

Staff tools & support

Omnicare[®]
a  **CVS**Health.com^{company}

Our hands-on solutions address both clinical and administrative staff needs so you can spend less time working in complicated systems and more time focusing on resident care.

Omniview

Omniview is a secure, web-based environment that makes managing pharmacy activities easy and convenient for your staff, helping them to optimize efficiency and reduce costs. As a central connection point between your facility and pharmacy, Omniview has specialized tools and capabilities designed specifically for each function within your facility. Both clinical and business users will have a stress-free way to communicate and collaborate with the pharmacy without disruption to facility operations — affording them more time to devote attention to caring for residents.

Omniview provides total access to:

Easy-to-use tools

- Check drug costs, refill medications, process returns and destructions, manage census and invoices and proactively reduce non-covered charges, easy access to OmniPlanFinder

Complete transparency

- Track order status, proactively manage new admissions and view resident profiles

Reporting and resources

- Utilize interactive clinical and financial reporting and reference materials to monitor utilization and manage community expenses

OmniceLL

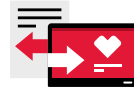

OmniceLL, a state-of-the-art automated dispensing unit, can be used alongside modern medical carts designed to optimize patient care. These systems not only aid in regulatory compliance and security, but also help increase quality of care for your residents through:

- Faster access to first doses, emergency medications and new medication orders — no need to wait for special deliveries
- Better availability of medications for dynamic drug regimens of higher acuity patients
- Improved patient care may boost referrals and create a more positive and trusting experience for residents and their families

Connected Care navigation

It's important to work with a pharmacy that is prepared to help you optimize efficiency and your residents' medication management experience. That's why we've developed strategic relationships with EHR systems and actively partner with industry-leading EMR/eMar software providers.

Transitions of Care

Our resident-centered approach to Transitions of Care is designed to reduce hospital readmissions, improves resident outcomes and helps customers meet evolving regulatory requirements.

- Real-time data exchange to access hospital discharge data and pre-populate pharmacy orders in facility's EMR
- Admission Medication Regimen review to help facilities meet requirements of the IMPACT Act
- Support for evolving reimbursement models
